

1.) Find and Double click on the Teamviewer Icon

2.) Select Remote Control. Tell the Miwa rep what your ID and Password is, so they can connect to your PC.

A screenshot of the TeamViewer application window. The left sidebar has a dark blue background with various icons and links: "TeamViewer" (selected), "Remote Support" (highlighted with a red box), "Devices", "Chat", "DEX Essentials", "More solutions", "Special offers", "Admin settings", "Feedback", and "Help". The main area has a light blue header with "Remote Support", a search bar, and a "Ctrl + K" keyboard shortcut. Below the header, there are tabs for "TeamViewer ID" and "Sessions". The central part of the window shows the "Allow remote control" section, which includes fields for "Your ID" (1451 018 906) and "Password" (bgq5gkx4), both of which are highlighted with an orange box. To the right, there's a "Control remote device" section with a dropdown menu set to "Remote control" and a "Connect" button. At the bottom, there's a checkbox for "Grant Easy Access to this device" and a status message "Ready to connect (secure connection)".
